

FENCEGUARD™

Grounds Maintenance Solution

Issue: Safety and access to trim grass along top edge of elevated wall
Customer: City of Wayzata (MN)
Solution: FENCEGUARD installed by city staff

Customer Feedback:

“We installed FENCEGUARD underneath the wrought iron fencing in our city cemetery. We have been very pleased with the product – both with the appearance and functionality. We cut our own post cuffs to fit our 2.5” square fence posts. We combined one 5.5 foot FENCEGUARD section with another which we cut to 4 feet in length to cover grass between posts which are spaced at 8 feet.”

Jim Eibensteiner, Public Works Superintendent
City of Wayzata (MN)
